PRIVACY POLICY

Privacy of personal information is important to **Orleans Gardens Chiropractic**. We are committed to the collection, use and disclosure of this information in a responsible way. We will also try to be as open and transparent as to how we handle personal information.

Personal Information

Personal information is information about an identifiable individual. Generally, the information we collect is limited to your name, home contact information, gender and age. As part of your patient file we retain your health history; health measurements and examination results; health conditions, assessment results and diagnoses; the health services provided to you or received by you; your prognosis and other opinions formed; compliance with treatment; and the reasons for your discharge and discharge recommendations. We also maintain records for payment and billing purposes. Only necessary information is collected about you. We only share your information with your consent; the use, retention and destruction of your personal information complies with existing legislation and privacy protection protocols. Privacy protocols comply with privacy legislation standards of our regulatory body, the College of Chiropractors of Ontario and the law.

Staff Members

Staff members who come into contact with your personal information are aware of the sensitive nature of the information you have disclosed to us. They are all trained in the appropriate uses and protection of your information. These individuals may include clinic administration, therapists, and when necessary, authorized individuals who may inspect our records as part of the regulatory activities in the public interest.

Disclosure of Personal Information

We understand the importance of protecting your personal information. To help you understand how we are doing that, we outline below how we use and disclose this information:

- To deliver safe and effective patient care
- To enable us to contact you
- To communicate with other health care providers
- To complete and submit the necessary documentation to the WSIB, or third-party payers
- To comply with legal and regulatory requirements under the Chiropractic Act and the Regulated Health Professions Act
- To process payments and collect unpaid accounts.

Please do not hesitate to discuss our Privacy Policy with any of the clinic staff. By signing the consent section of this form, you have agreed that you have given your informed consent to the collection, use and/or disclosure of your personal information for the purposes that are listed. If a new purpose arises for the use and/or disclosure of your personal information, we will seek your approval in advance.

Patient Consent I have reviewed the above information that explains how your clinic will use my personal information. I agree that the Doctors and Staff at Orleans Gardens Chiropractic can collect, use and disclose my personal information as set out above in the clinic's privacy code.

Informed Consent to Chiropractic Care

Doctors of Chiropractic who use manual therapy techniques are required to advise patients that there are or may be some risks associated with such treatment. In particular you should note:

- a) While rare, some patients may experience short term aggravation of symptoms, rib fractures, or muscles and ligament strains and sprains as a result of manual therapy techniques;
- b) There are reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence do not establish a cause and effect relationship between chiropractic treatment and the occurrence of stroke. Recent studies suggest that patients may be consulting medical doctors and chiropractors when they are in early stages of a stroke. In essence, there is a stroke already in progress. However, you are being informed of this reported association because a stroke may cause serious neurological impairment or even death. The possibility of such injuries occurring in association with upper cervical adjustment is extremely remote;
- c) There are rare reported cases of disc injuries identified following cervical and lumbar spinal adjustment, although no scientific evidence has demonstrated such injuries are caused, or may be caused, by spinal adjustments or other chiropractic treatment;
- d) There are infrequent reported cases of skin irritation/ bruising with the use of some types of instrument or therapy offered by some doctors of chiropractic.

Chiropractic treatment, including spinal adjustment, has been the subject of government reports and multidisciplinary studies conducted over many years and has been demonstrated to be effective treatment for many neck and back conditions involving pain, numbness, muscle spasm, loss of mobility, headaches and other similar symptoms. Chiropractic care contributes to your overall well being. The risk of injuries or complications from chiropractic treatment is substantially lower than that association with many medical or other treatments, medications, and procedures given for the same symptoms.

I acknowledge I have discussed, or have had the opportunity to discuss, with my chiropractor the nature and purpose of chiropractic treatment in general and my treatment in particular (including spinal adjustment) as well as the contents of this Consent.

I consent to the chiropractic treatments offered or recommended to me by my Chiropractor, including spinal adjustment. I intend this consent to apply to all my present and future chiropractic care in this office.
